

1. Main technical data:

Display contents: 6numbers+2prompts

Operate voltage: 4.5~5.2V

Static power current: <1mA(5.0V)

Character height: 5.0mm

Environment relative humidity: <85%

View angle: 12:00

Operate temperature: -30~+80℃

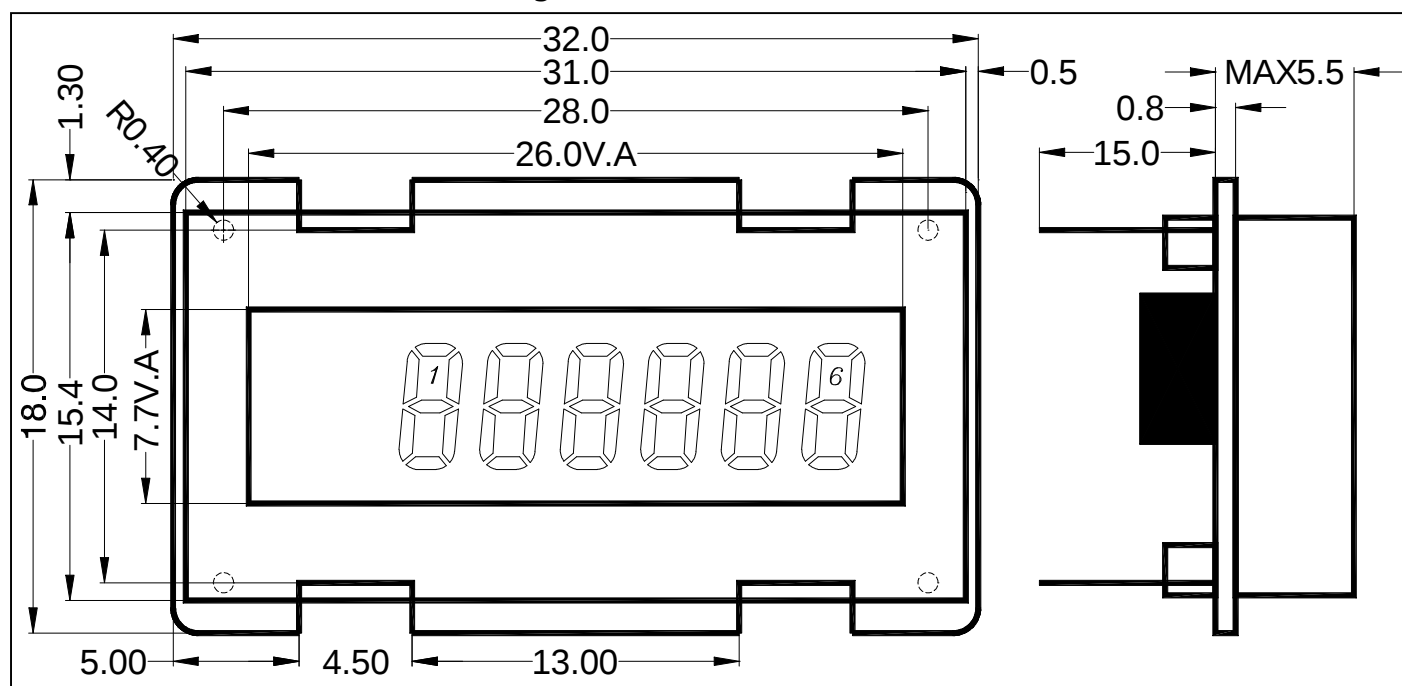

Display mode: Reflective positive

Storage temperature: -40~+85℃

Interface type: counter

2. Interface signs**instruction:**

1	V+:	positive power	2	V-:	Power ground
3	I:	Enable sign	4	R:	Reset

**3. Function instruction:**

- 1、V+ power on, Show count data of last power off
- 2、I Count increase 1 for each pulse (rising effective) .
- 3、R electrified for three seconds, all the count is clear.
